

entrée.DSD

Route Accounting Handhelds for Your Delivery Team

The **entrée.DSD** (Direct Store Delivery) route accounting system is a complete solution including one or more handheld computers communicating with your **entrée** server at your main office location.

It is a full featured solution that is affordable enough for a single route owner/operator and powerful enough for a company that distributes over multiple states from multiple warehouses.

Your delivery staff will use the handheld computer to input sales, returns, cash receipts, expenses and inventory transactions at the customers site.

At the end of the day, the collected information is transferred either directly or by modem into your **entrée** server at your main office location.

ROUTE ACCOUNTING HANDHELDS FOR YOUR DELIVERY TEAM

- ✓ A full featured Direct Store Delivery system
- ✓ Create Orders, Invoices, Credit Memo's and Payment Receipts
